

FEB 28 OBS

100% humidity; freezing dew; Moore opens
Get some more sleep

FEB 28 ANAL

SKY PLATS (FROM DATA ALONE) are NOT ENOUGH.

MARCH 1ST OBSERVING

~3:05 Arrive scope, Winds 30-40 MPH W

$T = -3.96^\circ\text{C}$ @ top of tube

Focus = 4840

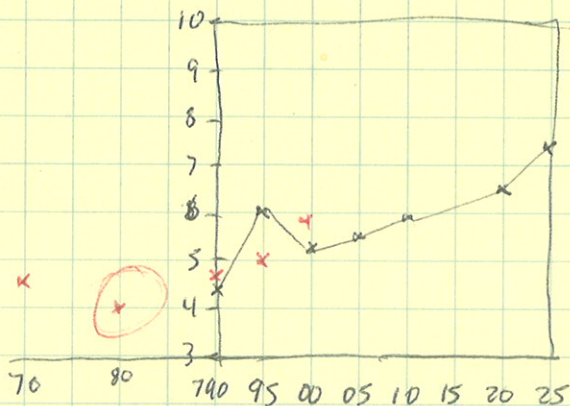

Hum = 26%

seeing ~1.2", says Olivier.

3:58 In the seat

- 1 Centering, Everyone's below 5600 ADU, go to 20sec
- 2 focus plate. (may be off by 10 focus pts for rows 2-4!)
- 3 refocus, ctr. around 4810

seeing's bad but consistent. Use 5-steps, one per 20's a good exp. time

- 4 focus again -

- 7 Focus is worse, T now -4.48
Take focus down 5 pts.
